

Description

Immersion sensors allow temperature recording in liquid and gaseous media and are designed for installation in existing or on-site immersion sleeves. The standard measurement unit contains a Pt1000 temperature sensor, according to DIN EN 60 751, class B, in a two-core connection.

Technical features and materials

General features

Measuring range -50°C÷+230°C

Dimensions

Diameter 6mm

Length silicon cable 1500mm

Bushing Length 50mm

Materials

Bushing material Stainless Steel
