

### / Description

Insulating adhesive perimeter strip made of closed-cell polyethylene foam, L pre-formed and ideal for heat-insulating panels. It absorbs the thermal dilatations of the panel and the film prevents the cements mixture from seeping in the lower part of the panel. Suitable for panel art. P106. Available in 25 mt rolls.

### / Products

ART.	CODE	DESCRIPTION
P108	88P108FA99L	Insulating perimeter strip - thickness 8 mm, height 150 mm.

### / Technical features

CHARACTERISTICS	UNIT OF MEASUREMENT	
Thickness	mm.	8
Height	mm.	150
Width	m.	25
Density	kg/mc	22
Colour		Orange
Thermal conductivity coefficient at 40 °C	W/(mk)	0.039
Insulation against footsteps $\Delta Wl$	dB	35
Dynamic stiffness	MN/mc	43
Compression stress at 10% deformation	kPa	14
